Ideation Phase
Empathy Map

Date	19 September 2022
Team ID	PNT2022TMID17614
Project Name	Project – Smart Farmer - IoT Enabled Smart Farming Application
Maximum Marks	4 Marks

Empathy:

In Agriculture, there are two major problems one is unpredictable climate change and another one is the yields of the crops that have been damaged by animals, birds, insects, and some crop diseases. These two problems affect the total agriculture production and farmers. They face a dramatical loss every year or yield. It must me solved for betterment of the farmers and also the environment. Our project will give the solution to overcome these problems with help of modern technology namely the Internet of Things (IoT).
